

## Leading edge technology

Optimised Point - its gripping effect ensures a faster grip, saving time and money and ensuring the perfect look.

### Key features:

For universal use in wood, chipboard, MDF, laminated wood materials, plastic and thin sheet metal.

### Multihead:

- Cutting ribs help the head countersink into wood easily.
- Screw head ribs help reduce the thread being stripped when fixing hinges etc.
- Deeper recess in screw-head for a stronger bit hold.
- YELLOX: Pozi bit recess.
- WIROX: T-Star Plus bit recess.

### 4CUT Point:

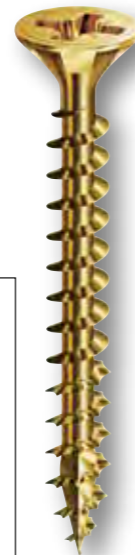

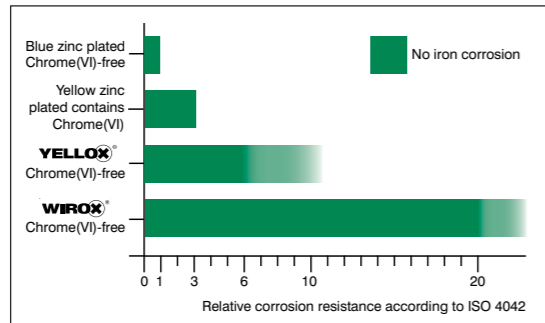

- No splitting even when working close to the edge.
- No pre-drilling required even in hard woods.
- Screw point takes immediate hold.

### Ground Serrations:

- Reduces driving in torque.
- Hard synthetic coating for easy driving.
- Ultimate holding power.

**SPAX YELLOX for a professional performance**

**CHROME(VI) FREE**

Both WIROX and YELLOX coating is free of chrome(VI) and so more environmentally friendly than conventional surfaces.

## Clear View Packaging

- Big window panel to easily identify screw.
- Easy to open box, slipcase slides out for easy access.
- Handy and stackable with label on front of box.

Stainless Steel

## Stainless Steel Screws

For wood, plastic and chipboard.

The SPAX stainless screw combines full protection against corrosion together with the other well known qualities of SPAX.

- Optimised head recess design give strong bit hold and help prevent bit slippage.
- Lower driving in torque and higher holding power through the patented ground serrations.
- New synthetic coating makes for easier driving in.
- Razor sharp point gives an accurate instant start.

Available T-Star Plus.

Due to special material properties pre-drilling may be necessary in some hard woods.

## Decking Screws

The ultimate decking screw.

- Patented ground serrations on the lower thread remove the need for pre-drilling\*.
- Non threaded shank allows two materials to be pulled together tightly.
- Upper thread locks the deck-board securely down tight.

### Key features:

- The T-Star Plus head stops the bit from slipping out.
- No splitting or splintering.
- Faultless appearance outdoors.

\*Pre-drilling is recommended in hardwoods.

A2 AND A4 Stainless Steel

WIROX corrosion protection

Stainless Steel

## Timber Construction Screws

The modern answer to the coach screw.

- Washer-head design gives increased pull down and pull through capacity.
- Universal screws for use inside and out in a variety of applications, ideal for timber to timber or sheet metal to timber fixing.
- Perfect for securing modern insulation and solar panels.

### Key features:

- No pre-drilling required even in hard wood.
- No splitting when working close to the edge.
- Screw point takes immediate hold.
- Ground serrations reduce driving in torque.
- Bit slippage avoided with a T-Star Plus recess.

Available lengths:	Dia Ø	LENGTHS
WIROX	6mm	60 - 300mm
WIROX	8mm	80 - 450mm
STAINLESS STEEL	6mm	60 - 140mm
STAINLESS STEEL	8mm	60 - 200mm

## Precision Bits

Professional, high quality, range of bits available in T-Star Plus, T-Star and Pozi.

## Size Conversion Chart

GAUGE		LENGTH	
2.5mm	=	3g	12mm = 1/2"
3.0mm	=	4g	16mm = 5/8"
3.5mm	=	6g	20mm = 3/4"
4.0mm	=	8g	25mm = 1"
4.5mm	=	9g	30mm = 1 1/4"
5.0mm	=	10g	35mm = 1 3/8"
6.0mm	=	12g	40mm = 1 1/2"
			45mm = 1 3/4"
			50mm = 2"
			60mm = 2 1/2"
			70mm = 2 3/4"
			80mm = 3"
			90mm = 3 1/2"
			100mm = 4"
			120mm = 4 3/4"
			150mm = 6"
			160mm = 6 1/2"
			180mm = 7"

## Flooring Screws

The ultimate flooring screw for all types of wooden flooring materials.

- No pre-drilling required.
- Non threaded shank allows two materials to be pulled together tightly.
- Upper thread locks the top board securely down tight.

### Key features:

- Cutting ribs on the head makes countersinking easier.
- The T-Star Plus head stops the bit from slipping out.
- No splitting or splintering.

## MDF Board Screws

Secure fastening solution for hard MDF board or thin chipboard.

- The patented ground serrations eliminate splitting and bulging on the front surface of your MDF board or when working close to the edge.
- The specially formed self-drilling point ensures exact screw positioning.

### Key features:

- No pre-drilling necessary.
- The torque requirement is minimal, and the time spent fastening is significantly reduced.
- The slender head with the ribbed underside countersinks easily into the material.

Available with T-Star Plus head.

## Frame Anchor Screws

Plug-free window and door frame fastening.

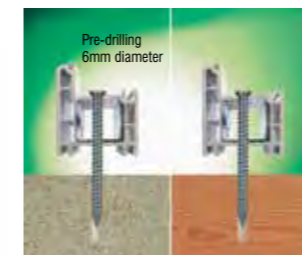

- Frame anchor screws enable you to fasten window and door frames made of any material to any type of stone or wood - without the use of plugs.
- The bite of the thread in the masonry and in the frame makes for secure, tension-free installation.
- The patented shaft profile makes screwing in easy and ensures a strong hold at the same time.

### Screw length consists of:

- Frame width
- Gap between frame and wall
- Depth of screw in wall.

6mm pre-drill diameter. The drilling depth equals the depth of screw in the wall plus 10mm.

Available with T-Star head.

Stone and concrete fastening

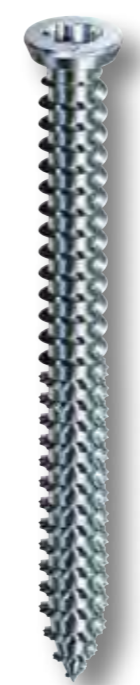

Fastening on wood

Frame connection

Fastening using lugs

Plastic cover caps available in white or black.

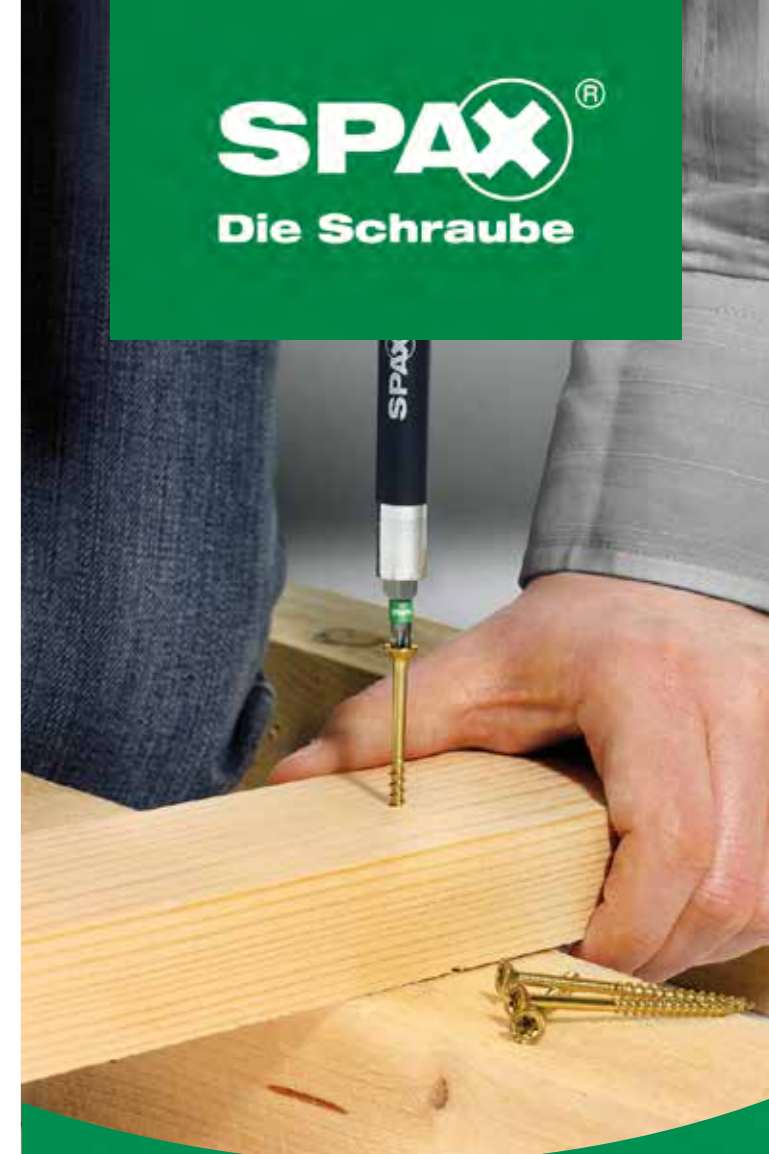

## Solid Wood Floor Screws

The SPAX for solid wood floors is optimised for laying floor boards.

- The specially sharp drill tip ensures accurate screwing without any pre-drilling.
- Takes hold immediately, preventing the material from slipping and splitting.
- Makes fastening screws easy, with minimum time and force.
- Slim head draws it easily into solid material.

Available with T-Star Plus head.
